

The logo features a stylized 'C' on the left, composed of a red outer ring and a yellow inner circle. To the right of the 'C', the words 'COLORADO', 'ENERGY CODE', 'COMPLIANCE', and 'COLLABORATIVE' are stacked vertically in a bold, blue, sans-serif font.

COLORADO ENERGY CODE COMPLIANCE COLLABORATIVE

ABOUT THE COLLABORATIVE. The Colorado Energy Code Compliance Collaborative meets to discuss strategies, challenges, updates, and ideas for advancing energy code compliance. Composed of code officials, state agencies, energy raters, builders, contractors, utilities, and energy advocates, we help coordinate trainings across the state; provide local expertise and technical assistance to jurisdictions; promote appropriate resources, tools, and incentives; discuss new and noteworthy topics in energy codes; and seek out and spread best practices between jurisdictions. Our collaborative is open to all and provides a forum for improving relations between diverse stakeholders affected by energy codes as we listen and learn about each other's concerns, with a goal of improving the usability of and adherence to the code.

QUARTERLY MEETINGS. The Colorado Energy Code Compliance Collaborative meets quarterly in person in the Denver area for a two-hour meeting, and a call-in number is provided for those that cannot attend in person. We typically have a special-topics presentation followed by a discussion of key happenings and challenges around energy codes.

JOIN THE COLLABORATIVE. To be notified of upcoming quarterly meetings and receive the minutes afterward, or if you have any questions about the Collaborative, email Christine Brinker of Southwest Energy Efficiency Project at cbrinker@swenergy.org.
