

# COLORADO INDUSTRIAL ENERGY CHALLENGE

*Improving Efficiency, Reducing Costs and Emissions*

## PARTNERSHIP AGREEMENT

The Colorado Industrial Energy Challenge (CIEC) is a voluntary State and business partnership that challenges Colorado's industrial firms to set energy efficiency goals and to demonstrate progress towards achieving the goals.

**WITH THIS AGREEMENT,** \_\_\_\_\_ *[Name of company or plant]*

### **JOINS THE COLORADO INDUSTRIAL ENERGY CHALLENGE AND COMMITS TO:**

- Set a 5-yr goal for reducing total energy consumption or energy intensity at our Colorado facility (s). We will work with the CIEC to set an acceptable goal based on the guidelines that the goal a) must be based on improvements from a recent base year, and b) must be aggressive for our industry sector (e.g., at least 2% per year improvement in energy intensity).
- Report base year (e.g., 2010) total energy use or energy intensity within 6 months of joining the program, using the simple tracking spreadsheet provided by the CIEC.
- Report annual energy consumption or energy intensity, by April 1 of each year (e.g., report by April 1, 2011 for calendar year 2010), to demonstrate progress towards the goal.

### **THE CIEC PROGRAM COMMITS TO:**

- Provide recognition from the Governor's Office for joining the program.
- Provide annual awards from the Governor's Office and other publicity for superior achievements.
- Help partners establish a system for tracking annual energy consumption and energy intensity.
- Provide opportunities for networking with other partner companies, and periodic webcasts or training workshops.

### **GENERAL TERMS AND CONFIDENTIALITY:**

- The CIEC program will not disclose energy consumption data that partners wish to keep confidential, providing that partners notify the program of such preferences.
