

FREE WEBINAR

AGENDA

- **Introduction/overview of webinar, introduce other speakers**
Presenter: Neil Kolwey, SWEEP
- **Energy efficiency opportunities in oil and gas production**
- **Keys to success in helping customers implement projects**
Presenter: Adam Selvin, CLEAResult
- **Examples of successful projects**
- **Benefits to the company of energy efficiency efforts**
Presenter: Mat Charney
- **Discussion**

APRIL 29, 2020
11:00 AM - 12:00 PM, MST

OIL AND GAS PRODUCTION

Energy Efficiency Opportunities
and Utility Programs

Who should attend?

- Utility energy efficiency program managers
- Oil and gas customers

There are many cost-effective opportunities for oil and gas production operations to reduce energy consumption per unit of energy produced. Several utility energy efficiency programs have been successful in helping the industry to reduce energy costs without disrupting production. In this one-hour webinar, our speakers will discuss lessons learned in helping the oil and gas industry reduce energy consumption and costs. This webinar is organized by the Southwest Energy Efficiency Project (SWEET) on behalf of the Colorado Energy Office.

SPEAKERS

ADAM SELVIN is Director of C&I Engineered Market Approach for CLEAResult. After spending much of his career as an energy engineer, his current focus is on energy efficiency program design and existing program optimization. Adam is a registered professional mechanical engineer and certified energy manager. Adam completed his MBA at the Haas School of Business at UC Berkeley and undergraduate degree in Mechanical Engineering at San Francisco State University and was recently selected as the US DOE Industrial Assessment Center's distinguished alumni of the year. Adam is a California native and he and his wife are raising their two daughters in the East Bay Area.

MAT CHARNEY is a Program Manager with CLEAResult, and the DSM implementer for Xcel New Mexico's Energy Commercial and Industrial Energy Efficiency program, where he has specialized in supporting the oil and gas industry. Since joining CLEAResult, the Oil & Gas program has increased participation and incentives 100% year over year for 3 years in a row. Before joining CLEAResult, Mat was a product and project manager at Intel supporting the Itanium launch and international logistics. Mat lives in Albuquerque, New Mexico.

NEIL KOLWEY is the Industrial Program Director at the Southwest Energy Efficiency Project (SWEET), where he promotes best practices in utility energy efficiency programs for industrial customers throughout the region. Neil also manages a voluntary program that provides networking and training opportunities to Colorado industrial facilities, and is the author of a recent short report on energy efficiency and electrification best practices for oil and gas production operations.
